DETAILED ACTION

Drawings

1. The drawings are objected to because the drawings are in French. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities:

- (1) "M?" should be replaced by -- \hat{M} --;
- (2) Page 3, line 11, the equation should be replaced by

Art Unit: 2882

$$\hat{M} = A_1 + A_2 \cdot \text{mes}_i + A_3 \cdot \text{mes}_j + A_4 \cdot \text{mes}_i^2 + A_5 \cdot \text{mes}_j^2 + A_6 \cdot \text{mes}_i \cdot \text{mes}_j \text{--};$$

(3) Page 4, line 13, "selling" should be replaced by --choosing--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. Claim 1 fails to set forth explicit method steps.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2882

6. Claims 1, 2, and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Dolazza *et al.* (U. S. Patent No. 6,678,350 B2).

With regard to claims 1 and 4, Dolazza *et al.* disclosed a method comprising the steps of: using broad spectrum x-rays; and calculating the weighting factors (130, 132) such that the combination (126) has minimal noise (column 6, line 16-34).

With regard to claim 2, Dolazza *et al.* disclosed a method according to claim 1, wherein the combination of the expression in linear (addition).

Conclusion
